The CALLS-M-ALL GAME CALL with the instructional tape was fun to test. I played
the tape as I drove to work and soon was able to duplicate the sounds.

The best thing is the rubber bands are the only things that ever have to be
replaced. I field tested the product and was surprised how many sounds this
product would produce. The only sounds I haven't mastered completely are the
some of the turkey talk. The product is small enough to carry in a shirt
pocket, and the great thing is no other calls are needed. I do recommend
the CALLS-M-ALL GAME CALL.

I hunted Elk in Colo. the conditions
were hot, and the Elk weren't talking
much, But I was able to cow talk
a nice cow to within 35 yards of
my partner, but with trees and brush
in the way he wasn't able to get
a shot off.

I did all the cow talking my self,
and it was really easy to use.
And I hope to have just as good of
luck with other animals.

Hancock's Calls will be my only call
from now on.

I recommend CALLS-M-ALL to all outdoors people who want to call animals up to them either for hunting or photography it really works. I used the call to Archery Elk hunt this year and it really worked. The call was easy to use and it seemed to coax the cows and bulls into bow range. I was successful in harvesting a nice bull and I cant wait to try it on coyotes this winter. (P.S.) The instructional tape was real handy and taught me some new ways to call in animals.
